

# Assignment

## UML diagram of Counter App:

## Code:

```
import { useState } from 'react'
import './App.css'

function App() {
  const [count, setCount] = useState(0)

  return (
    <>
    <div>

    </div>
    <h1>Group 4</h1>
    <div className="card">
```

```
    <button onClick={() => setCount((count) => count + 1)}>
      count is {count}
    </button>

  </div>

</>
)
}

export default App
```

**Display:**

## Group 4

count is 0
